Allowable Subject Matter

1. Claims 32, 39, 41, 43, and 45 of which have been renumbered as 1-5 respectively are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-5, the prior art of record fails to teach of a second mobile unit operable to transmit a second content, where the second content comprises voice content received from a user of the second mobile unit, the first and second mobile units participating in a conference call. The closest reference, Moon et al. (U.S. Application No. 09/670055), teaches of a communication system comprising a first mobile unit, a plurality of base transceiver stations, one or more routers and a plurality of graded packets, but fails to teach of a second mobile unit operable to transmit a second content, where the second content comprises voice content received from a user of the second mobile unit, the first and second mobile units participating in a conference call. Additionally, Wager et al. (U.S. Patent No. 6,691,273), teaches of combining different portions of the content from each of two graded packets to create an improved packet, but fails to teach of a second mobile unit operable to transmit a second content, where the second content comprises voice content received from a user of the second mobile unit, the first and second mobile units participating in a conference call.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
